

Requirements	Incomplete (0)	Does Not Meet Expectations (1)	Meets Expectations (2)	Exceeds Expectations (3)
Well-articulated problem statement with "specific aim" and hypothesis, based on your lightning talk				X
An outline of any potential methods and models			X	
Detailed explanation of extant data available			X	
Describe any outstanding questions, assumptions, risks, caveats			X	
Define your goals and criteria, explain what success looks like			X	
Demonstrate domain knowledge, including features or benchmarks from similar projects				X

Notes:

Is propensity for one or proportion of pop. better? If data by state is different, and each state is big enough, pick one if pressed for time.
